PROFILE

Software Engineering graduate with full-stack development experience building SaaS platforms, internal portals, marketplaces, and security-focused applications. Experienced with Next.js, React, Node.js, Express, Django, and PostgreSQL database design. Built production-style applications through an internship at the Information Network Security Administration (INSA) and through freelance development projects. Passionate about creating reliable, secure, and user-focused software solutions.

EXPERIENCE

Full-Stack Developer Intern | Information Network Security Administration (INSA)

Feb 2026 – Jul 2026

- Contributed to the development of two internal platforms for INSA: a personality assessment SaaS application and an organization-wide intranet portal
- Developed responsive frontend interfaces and administrative dashboards using Next.js and TypeScript
- Integrated frontend components with backend services and participated in testing, debugging, and Git-based Agile workflows

Freelance Web Developer | Self-Employed

Jan 2026 – Present

- Built and deployed web applications for small businesses and individual clients using the MERN and Next.js ecosystems.
- Managed the full project lifecycle: requirements gathering, development, testing, and deployment
- Communicated directly with clients to scope work, set timelines, and gather feedback

PROJECTS

INSA Personality Assessment SaaS Platform

Full-Stack Developer | SaaS application for conducting personality assessments, generating reports, and managing users

- Implemented assessment workflows, automated personality scoring, and report generation features.
- Developed role-based dashboards for administrators and users.
- Integrated frontend components with backend services and PostgreSQL data models.

Technologies: *Next.js • Go • PostgreSQL • TypeScript • Tailwind CSS*

INSA Intranet Portal

Full-Stack Developer | Internal portal centralizing communication, announcements, and document sharing for INSA

- Developed role-based dashboards for internal users and implemented document and announcement management features.
- Integrated frontend components with backend services and participated in testing and deployment.

Technologies: *React • Spring Boot • PostgreSQL • Tailwind CSS • TypeScript*

Hyperlocal Service Marketplace

Full-Stack Developer | Platform connecting customers with nearby service providers for booking and communication

- Designed and implemented REST APIs for users, services, bookings, and reviews.
- Built relational database models using PostgreSQL and Prisma ORM.
- Developed customer and service-provider workflows across web and mobile applications.

Technologies: *Next.js • Node.js • Express.js • PostgreSQL • Prisma • TypeScript • Tailwind CSS • Dart*

Ethio Booking

Full-Stack Developer | Hotel and accommodation booking platform for users in Addis Ababa

- Developed accommodation booking workflows with REST APIs and responsive frontend interfaces.
- Designed PostgreSQL schemas and implemented backend services using Node.js, Express, and Prisma.

Technologies: *Next.js • Node.js • Express.js • PostgreSQL • Prisma • TypeScript*

EDUCATION

BSc in Software Engineering — Haramaya University

2022 – 2026

Haramaya, Ethiopia

GPA: 3.61 / 4.0 | Exit Exam: 81.25%

SKILLS

Languages: JavaScript, Java, TypeScript, Python, Dart

Frontend: React & Next.js, Tailwind CSS, Flutter

Backend: Node.js & Express.js, Spring Boot, Django

Databases & ORM: PostgreSQL, Prisma, Supabase

Security: OWASP Top 10, Burp Suite

Other: Git & Agile/Scrum, REST API Design

LANGUAGES & CERTIFICATES

Languages: Amharic (Native), Afan Oromo (Native), English (Fluent)

Certificates: INSA Cyber Talent Summer Camp | 4th Batch (2025)
